EMPLOYMENT

React Developer (Part-Time) **iKnowly** **Oct 2024 – Present**

- Collaborated on implementing a new app design to improve usability.
- Integrated WebSocket to enable real-time notifications for users.
- Developed a seamless consultation booking flow with Stripe integration for secure payment processing.
- Built a chat system to facilitate communication between consultants and consultees, improving platform functionality.

React Developer (Freelance) **Flawtrack** **Dec 2023 – Aug 2024**

GDD Gaza Dashboard

- Integrated Next.js SSR and SSG for optimized SEO, improving site performance and visibility.
- Implemented localization to 4 languages using i18n libraries, enhancing accessibility and user experience.
- Developed statistics, tables, and charts for comprehensive data analysis and presentation.

Next JS Developer (Part-Time) **Xapprika** **Oct 2022 – Mar 2024**

- Implemented localization, integrated Firebase and Algolia, and enabled global search within the app.
- Facilitated role-based chatting and managed user access based on permissions.
- Built a user review system with Google Maps integration.
- Leveraged Redux for state management, reducing component complexity and improving efficiency.
- Demonstrated adaptability by learning new frameworks and tools, contributing to faster project iterations.
- Integrated REST APIs and GraphQL endpoints, improving data fetching efficiency and reliability.

React Developer (Part-Time) **Sahm** **Nov 2021 – Apr 2024**

- Implemented secure authentication/authorization, generated reports, developed complex forms/charts, integrated Google Maps with real-time notifications, and managed subscription plans.
- Refactored two main modules, enhancing code quality, performance, and maintainability.
- Delivered pixel-perfect, responsive UIs, meeting 100% of design specifications.
- Applied Agile and Scrum methodologies alongside Jira for efficient task management and team collaboration.

Frontend Developer (Full-Time) **Akoin** **Jul 2021 – Jun 2022**

- Utilized HTML5, CSS3, and modern design techniques to create responsive layouts across devices.
- Developed React components with JavaScript (ES6+) and TypeScript for dynamic and scalable applications.
- Integrated Web3 technologies, Cryptocurrency, NFTs, and MetaMask, while managing and refactoring legacy code.
- Collaborated with the team to build and enhance the company website.

EDUCATION

Cairo, Egypt **University of Al-Azhar** **Sep 2011 – May 2018**

- B.S.E. in Electrical Engineering, May 2018. In-major GPA: 3.

TECHNICAL EXPERIENCE

Projects

- [iKnowly](#) (2024). Consultation platform in Germany where I helped them to implement new design to the app and add new features.
- [GDD Gaza Dashboard](#) (2023 – 2024). Reporting app about Gaza where I helped GDD organization to visualize the latest news and information about Gaza strip.
- [Helm Recruitment Platform](#) (2022 – 2024). Recruitment platform for hiring of persons with disabilities where I helped Helm company to build app to link them with companies and persons with disabilities

ADDITIONAL EXPERIENCE AND CERTIFICATIONS
