Azhar University B.S. in Electrical Engineering Sep 2012 - May 2018

Professional Experience

React Developer (Freelancer) Oct 2022 - Present
Xapprika Egypt and Remote

- Xapprika is an Egyptian tech company with an office locally. considered one of the top startups in Egypt
- Worked on Xapprika on 2 projects, Khatwa and Entalek
- I have build the 2 web apps from scratch using Next.js, Tailwind.css and Redux.js
- The idea of Khatwa app is to help companies to find the qualified persons with disabilities to join the company as employees.
- The idea of Entalek app is to help persons with disabilities to find the best places suitable for them and make a review for the suitable places.
- I use Next.js, Tailwind.css, Redux.js, Firebase, RESTful APIs, Google maps and Algolia in thos web apps, Google maps

React Developer (Freelancer) Nov 2021 - Present
Soft IT KSA and Remote

- *Soft IT* is a KSA company which works in the tech field
- I work on a real estate project called Lath and it's admin dashboard
- I have built the web apps from scratch using Next.js, Tailwind.css and Recoil.js
- The idea of Lath app is to manage the properties and units of a real estate company in KSA and give them reposts for everything related to those properties and units
- Implemented and participated in the agile development process, including daily scrum meetings, sprint planning, backlog grooming, and retrospectives

Frontend Developer June 2021 - Jul 2022
Akoin.io. USA and Remote

- *Akoin.io* is a USA startup company which works in the crypto currency field
- Developed the [akoin.io](#) website from scratch
- Developed the [MADDAWGS](#) web app from scratch
- Implemented and participated in the agile development process, including daily scrum meetings, sprint planning, backlog grooming, and retrospectives
- I use Next.js, Tailwind.css, Redux.js, and RESTful APIs in That web app
